About Me

About Me

Shivani Siddula

Aspiring Data Analyst.

• Data enthusiast focused on improving project efficiency through KPI tracking and risk analysis.

• Skilled in transforming complex datasets into clear, actionable dashboards. Detail-oriented with a strong interest in data analytics.

Skills :
- Excel
- Pivot Tables
- Data Cleaning
- Dashboard Design
- Data Visualization

About This Project :

This Project Management Analytics Dashboard was built using Microsoft Excel to analyse 4,000 projects across 6 project types — Construction, Healthcare, IT, Manufacturing, Marketing and R&D — with a total portfolio value of $4.57 Billion.

The dashboard covers 3 key analysis areas:
→ Project Data (Stakeholder Analysis)
→ Risk & Estimation (Budget & Risk Tracking)
→ Project Status (Phase & Progress Monitoring)

• Key findings include a critical budget utilization rate of 94.57% and nearly 50% of projects classified as High or Critical risk — requiring immediate management attention.
